**FOR IMMEDIATE RELEASE:**

**BarbaraCares Foundation Receives Grant from the National Football League Foundation to Advance Breast Cancer Support**

Fort Worth, TX — The BarbaraCares Foundation is proud to announce it has been awarded a grant from the National Football League (NFL) Foundation, an organization dedicated to supporting the health, safety, and wellness of athletes, youth, and communities across the country. This generous support underscores the NFL Foundation’s commitment to creating meaningful change beyond the field and investing in programs that strengthen and uplift lives.

The NFL Foundation is the philanthropic arm of the National Football League, focusing on initiatives that promote player health and safety, youth and high school football, and community wellness. Through grants, partnerships, and outreach efforts, the foundation works to ensure that the impact of the NFL extends far beyond the game, touching families and communities in lasting and transformative ways.

For BarbaraCares, this grant represents more than financial support; it is a vital investment in the lives of breast cancer patients and their families across Texas. The funds will help the organization continue to expand access to mammogram screenings, provide critical patient resources, and ensure that no one has to fight breast cancer alone.

“We are deeply honored to receive this grant from the NFL Foundation,” said Xavier Sanders, Executive Director of BarbaraCares. “The NFL’s leadership in philanthropy reflects a commitment to tackling some of the most pressing issues facing our communities. Their support strengthens our ability to reach patients where they are, provide life-saving resources, and inspire hope at a time when it is needed most. We are grateful for their partnership and belief in our mission.”

As BarbaraCares continues its mission of education, advocacy, and patient support, community partners like the NFL Foundation play a crucial role in fueling change. Together, these efforts bring us closer to a world where access to care is not limited by barriers to care.
